Contents

Process design for closed-die forging of bevel gear by finite element analyses 1
J.-H. Song, Y.-T. Im

Fluid-pressure-assisted deep drawing 8
S. Thiruvarudchelvan, M.J. Tan

A flexible shear spinning of axi-symmetrical shells with a general-purpose mandrel 13
K. Kawai, L.-N. Yang, H. Kudo

Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets 18
C.S. Namoco Jr., T. Iizuka, N. Hatanaka, N. Takakura, K. Yamaguchi

3D nano-scale cutting model for nickel material 27
Z.-C. Lin, J.-C. Huang, Y.-R. Jeng

Parametric study on thrust force of core drill 37
C.C. Tsao, H. Hocheng

Empirical analysis of cutting force constants in micro-end-milling operations 41
G. Newby, S. Venkatachalam, S.Y. Liang

Development of cBN ball-nosed end mill with newly designed cutting edge 48
M. Jin, I. Goto, T. Watanabe, J.-i. Kurosawa, M. Murakawa

Characteristics of ZnO thin film deposited by ion beam sputter 55
H.-Y. Tsai

Photocatalytic activity of doped TiO_2 coatings prepared by sputtering deposition 60
S.-M. Chiu, Z.-S. Chen, K.-Y. Yang, Y.-L. Hsu, D. Gan

The study of rapid prototyping process with embedded functional inserts 68
Y.S. Liao, H.C. Li, M.T. Chen

Development of epoxy matrix composites for rapid tooling applications 75
S. Ma, I. Gibson, G. Balaji, Q.J. Hu

Investigations into the effects of electron beam welding on thick Ti–6Al–4V titanium alloy 83
N. Saresh, M.G. Pillai, J. Mathew

Surface transformation of DF-2 steel after continuous mode laser irradiation 89
M. Hua, SeDao, T.M. Shao, H.Y. Tam

In vitro study of bone-like apatite coatings on metallic fiber braids 97
J.-H. Lin, C.-W. Lou, C.-H. Chang, Y.-S. Chen, G.-T. Lin, C.-H. Lee

Processing of thin metal strip by casting-cum-rolling 101
S.X. Zhang, H.M. Myo, K.B. Lim, K.K. Tong, M.S. Yong, S.F. Pook, M.W. Fu

Casting of wire-inserted composite aluminum alloy strip using a twin roll caster 108
T. Haga, K. Takahashi, H. Watari, S. Kumai

The effect of solidification time in squeeze casting of aluminium and zinc alloys 114
L.J. Yang

Study of deformation homogeneity in the multi-pass equal channel angular extrusion process 121
Y.W. Tham, M.W. Fu, H.H. Hng, M.S. Yong, K.B. Lim

Study on flanged shapes in fineblanked-hole flanging process (FB-hole flanging process) using finite element method (FEM) 128
S. Thipprakmas, M. Jin, M. Murakawa

Elsevier B.V.

Analysis acoustic emission and sound during the paperboard of cutting process 134
Y. Fukuzawa, S. Nagasawa, S. Suzuki, I. Katayama, A. Sadamoto

An investigation of cutting forces and surface damage in high-speed turning of Inconel 718 139
R.S. Pawade, S.S. Joshi, P.K. Brahmankar, M. Rahman

Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V 147
A.K.M.N. Amin, A.F. Ismail, M.K. Nor Khairusshima

A study on ultrasonic vibration cutting of low alloy steel 159
C. Nath, M. Rahman, S.S.K. Andrew

Surface finish and integrity of machined surfaces on Al/SiCp composites 166
U.A. Dabade, S.S. Joshi, R. Balasubramaniam, V.V. Bhanuprasad

Pocketing toolpath optimization for sharp corners 175
Z.Y. Zhao, C.Y. Wang, H.M. Zhou, Z. Qin

Tool design for the tubular press forming of a rear suspension member with the finite element analysis 181
S.-H. Kim

Investigation into cold extrusion of aluminum billets using three-dimensional finite element method 188
D.-C. Chen, S.-K. Syu, C.-H. Wu, S.-K. Lin

Toolpath generation for diamond shaping of aspheric lens array 194
C.-C.A. Chen, C.-M. Chen, J.-R. Chen

Analysis of draw-wall wrinkling in the stamping of a motorcycle oil tank 200
F.-K. Chen, Y.-C. Liao

Tool-based micro-machining 204
A.B.M.A. Asad, T. Masaki, M. Rahman, H.S. Lim, Y.S. Wong

Nanopatterning mask fabrication by femtosecond laser irradiation 212
Y. Zhou, M.H. Hong, J.Y.H. Fuh, L. Lu, B.S. Luk'yanchuk, C.S. Lim, Z.B. Wang

Calculation of strain gradient in flow formulation using strain surface function and its applications to micro rolling 218
S.M. Byon, Y. Lee

Nanocrystalline grain size control for $Ni_{80}Fe_{20}$/Cu micro-composite wires by different electrodeposition methods 225
H.L. Seet, X.P. Li, K.S. Lee, H.Y. Chia

Manufacture of three-dimensional valveless micropump 229
Y.-L. Cheng, J.-H. Lin

An investigation of material flow analysis in fineblanking process 237
S. Thipprakmas, M. Jin, M. Murakawa

Experiments on T-shape hydroforming with counter punch 243
Y.M. Hwang, T.C. Lin, W.C. Chang

High pressure diecasting module of InteCAST software and its applications 249
J.X. Zhou, L.L. Chen, D.M. Liao, R.X. Liu

Synthesis of complex ceramics by mechanochemical activation 255
T. Sritharan, F.Y.C. Boey, A. Srinivas

Transfer molding of bamboo 259
O. Yamashita, Yokochi, H. Imanishi, K. Kanayama

Effect of surface hardness of counter plate on crushing of blade tip during pushing shear of paperboard 265
S. Nagasawa, S. Nagae, Y. Fukuzawa, S. Chaijit, K. Yamashita, M. Murayama, I. Katayama

Removal rate and surface roughness in the lapping and polishing of RB-SiC optical components 276
H.Y. Tam, H.B. Cheng, Y.W. Wang

High speed MQL finish-turning of Inconel 718 with different coated tools 281
Y. Kamata, T. Obikawa

Development and performance evaluation of an ultra precision ELID grinding machine 287
T. Saleh, M.S. Rahman, H.S. Lim, M. Rahman

Investigation of the influence of process parameters on hot extrusion of magnesium alloy tubes 292
S.H. Hsiang, Y.W. Lin

Feasibility study of twin roll casting process for magnesium alloys 300
H. Watari, T. Haga, N. Koga, K. Davey

Experimental investigation of ultrasonic vibration-assisted tapping 306
K.-L. Kuo

Two-stage sintering of nano-sized yttria stabilized zirconia process by powder injection moulding 312
P.C. Yu, Q.F. Li, J.Y.H. Fuh, T. Li, L. Lu

Weaving technology and mechanical properties of extended-PTFE fabrics 319
C.-W. Lou, C.-W. Lin, C.-H. Lei, H.-C. Chen, Y.-M. Li, J.-H. Lin

Optimal process of warp-knitting fabric with multiple functions 323
C.W. Lou, C.H. Lei, C.W. Chang, J.M. Chen, C.-H. Hsu, C.B. Huang, J.H. Lin

Sub-micron surface patterning by laser irradiation through microlens arrays 328
C.S. Lim, M.H. Hong, Y. Lin, G.X. Chen, A. Senthil Kumar, M. Rahman, L.S. Tan, J.Y.H. Fuh, G.C. Lim

Micro-mould fabrication for a micro-gear via vacuum casting 334
Y. Tang, W.K. Tan, J.Y.H. Fuh, H.T. Loh, Y.S. Wong, S.C.H. Thian, L. Lu

Hybrid laser micro/nanofabrication of phase change materials with combination of chemical processing 340
Y. Lin, M.H. Hong, G.X. Chen, C.S. Lim, L.S. Tan, Z.B. Wang, L.P. Shi, T.C. Chong

Electrodeposition of Ni–Fe micro-pillars using laser drilled templates 346
H.L. Seet, X.P. Li, M.H. Hong, K.S. Lee, K.H. Teh, H.H. Teo

Cold drawing of micro $Ni_{80}Fe_{20}$/Cu composite wires 350
H.L. Seet, X.P. Li, K.S. Lee, L.Q. Liu

Back pressure equal channel angular consolidation—Application in producing aluminium matrix composites with fine flyash particles 355
X. Wu, K. Xia

Effect of deformation condition on structure development in nickel base alloy 360
P. Wangyao, L. Kraus, J. Zrnik, S. Nemecek

Relationship of microstructure and mechanical properties of TRIP-aided steel processed by press forging 367
J. Zrnik, O. Stejskal, Z. Novy, P. Hornak

An analysis of forming limit in the elliptic hole-flanging process of sheet metal 373
T.-C. Chen

Thermo-elasto-plastic finite element analysis of quenching process of carbon steel 381
S.H. Kang, Y.T. Im

Image segmentation and analysis for porosity measurement 391
A.A. Malcolm, H.Y. Leong, A.C. Spowage, A.P. Shacklock

Influence of initial texture on formability of aluminum sheet metal by crystal plasticity FE simulation 397
Y.P. Chen, W.B. Lee, S. To

A study of forming pressure in the tube-hydroforming process 404
F.-K. Chen, S.-J. Wang, R.-H. Lin

The characteristics of polyamide layered-silicate nanocomposites 410
S. Yu, J. Zhao, G. Chen, Y.K. Juay, M.S. Yong

Manufacturing process and property analysis of industrial flame retarded PET fiber and polyurethane composite 415
I.-J. Tsai, C.-H. Lei, C.-H. Lee, Y.-C. Lee, C.-W. Lou, J.-H. Lin

Performance Study of compact wood powder material processing for improved impact characteristics aiming at substitute for plastics . . . 422
T. Miki, K. Takeuchi, H. Sugimoto, K. Kanayama

PET/PP blend with bamboo charcoal to produce functional composites 428
C.-W. Lou, C.-W. Lin, C.-H. Lei, K.-H. Su, C.-H. Hsu, Z.-H. Liu, J.-H. Lin

High temperature deformation in Ti–5Al–2.5Sn alloy 434
M.J. Tan, G.W. Chen, S. Thiruvarudchelvan

High porosity and large pore size shape memory alloys fabricated by using pore-forming agent (NH_4HCO_3) and capsule-free hot isostatic pressing 439
Y.P. Zhang, B. Yuan, M.Q. Zeng, C.Y. Chung, X.P. Zhang

Corrosion resistance of sintered duplex stainless steels in the salt fog spray test 443
L.A. Dobrzański, Z. Brytan, M.A. Grande, M. Rosso

Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing 449
A.V. Nagasekhar, Y. Tick-Hon, H.P. Seow

Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method 453
J. Tanabe, T. Sasaki, S. Kishi

Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model 459
K. Kanlayasiri, S. Boonmung

An alternate approach to free-form surface fabrication 465
K.-L. Yiu, H.-Y. Tam

Electrode form design of large holes of die material in ultrasonic electrochemical finishing 470
P.S. Pa

Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes 478
A.W.-J. Hsue, M.-T. Yan, S.-H. Ke

Developing the polymer abrasive gels in AFM processs. 486
A.C. Wang, S.H. Weng

Intelligent identification of turning process based on pattern recognition of cutting states 491
S. Tangjitsitcharoen, T. Moriwaki

Developing a realistic FE analysis method for the welding of a NET single-bead-on-plate test specimen 497
X.Y. Shan, M.J. Tan, N.P. O'Dowd

Modelling of CCT diagrams for engineering and constructional steels 504
J. Trzaska, L.A. Dobrzański

Solidification modeling in continuous casting by finite point method 511
L. Zhang, Y.-M. Rong, H.-F. Shen, T.-Y. Huang

The simulation of the multi-pass and die-less spinning process 518
C.-H. Liu

Temperature history for cutting of ceramics preheated by a CO_2 laser. 525
C.Y. Ho, M.Y. Wen, J.E. Ho, D.Y. Chen

Influence of reprocessing on the mechanical properties and structure of polyamide 6 532
K.-H. Su, J.-H. Lin, C.-C. Lin

Processing treatment of a lead-free Sn–Ag–Cu–Bi solder by rapid laser-beam reflowing and the creep property of its soldered connection. . . 539
X.P. Zhang, C.B. Yu, Y.P. Zhang, S. Shrestha, L. Dorn

The investigation of fiber carding performance with the application of static electricity to carded nonwoven fabric process 543
W.-H. Hsing, J.-H. Lin, K.-T. Kao

Comparison of electromagnetic shielding effectiveness properties of diverse conductive textiles via various measurement techniques . . . 549
H.C. Chen, K.C. Lee, J.H. Lin, M. Koch

Maximum *m* superplasticity deformation for Ti–6Al–4V titanium alloy 555
G. Wang, M.W. Fu

Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template 561
J. Zhu, B.Y. Tay, J. Ma

Structure and properties of magnesium cast alloys 567
L.A. Dobrzański, T. Tański, L. Čížek, Z. Brytan

Bulk nanostructured processing of aluminum alloy 575
Y.W. Tham, M.W. Fu, H.H. Hng, M.S. Yong, K.B. Lim

Applications of the artificial intelligence methods for modeling of the ACAlSi7Cu alloy crystallization process 582
L.A. Dobrzański, R. Maniara, J. Sokolowski, W. Kasprzak, M. Krupinski, Z. Brytan

A study on the thermodynamics of in situ $MgAl_2O_4$/Al MMC formation using amorphous silica sources 588
V.M. Sreekumar, R.M. Pillai, B.C. Pai, M. Chakraborty

Computer simulation of hard magnetic composite materials Nd–Fe–B properties 595
L.A. Dobrzański, M. Drak, J. Trzaska

Numerical analysis for bifurcation fracture of sheet metal forming 602
Y.-M. Huang, S. Kuriyama

Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation 607
M.B. Cai, X.P. Li, M. Rahman

Subject Index of Volumes 192–193

Abaqus
Developing a realistic FE analysis method for the welding of a NET single-bead-on-plate test specimen, 497
Abrasion
Effect of surface hardness of counter plate on crushing of blade tip during pushing shear of paperboard, 265
Abrasive flow machining
Developing the polymer abrasive gels in AFM processs, 486
Abrasive wear
A study on ultrasonic vibration cutting of low alloy steel, 159
Acoustic emission
Analysis acoustic emission and sound during the paperboard of cutting process, 134
AE
Investigations into the effects of electron beam welding on thick Ti–6Al–4V titanium alloy, 83
Air permeability
Optimal process of warp-knitting fabric with multiple functions, 323
Alkaline solution etching
Hybrid laser micro/nanofabrication of phase change materials with combination of chemical processing, 340
Alpha titanium alloy
High temperature deformation in Ti–5Al–2.5Sn alloy, 434
Aluminium alloy
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114
Study of deformation homogeneity in the multi-pass equal channel angular extrusion process, 121
Aluminium matrix composites
Back pressure equal channel angular consolidation—Application in producing aluminium matrix composites with fine flyash particles, 355
Aluminium strip
Processing of thin metal strip by casting-cum-rolling, 101
Bulk nanostructured processing of aluminum alloy, 575
Analysis of residuals
Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model, 459
Analysis of variance
Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model, 459
Apatite
In vitro study of bone-like apatite coatings on metallic fiber braids, 97
Aspheric lens array
Toolpath generation for diamond shaping of aspheric lens array, 194
Austenite conditioning
Relationship of microstructure and mechanical properties of TRIP-aided steel processed by press forging, 367
Ball-nosed end mill
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
Bamboo
Transfer molding of bamboo, 259
Bamboo charcoal
PET/PP blend with bamboo charcoal to produce functional composites, 428
Belt casting
Processing of thin metal strip by casting-cum-rolling, 101
Bending strength
Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets, 18
Bevel gear
Process design for closed-die forging of bevel gear by finite element analyses, 1
Bifurcation fracture
Numerical analysis for bifurcation fracture of sheet metal forming, 602
Bioactivities
In vitro study of bone-like apatite coatings on metallic fiber braids, 97
Blank holding
Fluid-pressure-assisted deep drawing, 8
Blanking
Study on flanged shapes in fineblanked-hole flanging process (FB-hole flanging process) using finite element method (FEM), 128
An investigation of material flow analysis in fineblanking process, 237
Broken chip
Intelligent identification of turning process based on pattern recognition of cutting states, 491
Bulk nanostructured materials
Study of deformation homogeneity in the multi-pass equal channel angular extrusion process, 121
Bulk nanostructured processing of aluminum alloy, 575

Capsule-free hot isostatic pressing
High porosity and large pore size shape memory alloys fabricated by using pore-forming agent (NH_4HCO_3) and capsule-free hot isostatic pressing, 439
Carbon steel
Thermo-elasto-plastic finite element analysis of quenching process of carbon steel, 381
Carded nonwoven fabric
The investigation of fiber carding performance with the application of static electricity to carded nonwoven fabric process, 543
Carding performance
The investigation of fiber carding performance with the application of static electricity to carded nonwoven fabric process, 543
Casting defect
High pressure diecasting module of InteCAST software and its applications, 249

Elsevier B.V.
doi:10.1016/S0924-0136(07)00701-7

CBN
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
CCOS
An alternate approach to free-form surface fabrication, 465
CCT diagram
Modelling of CCT diagrams for engineering and constructional steels, 504
Ceramics
Temperature history for cutting of ceramics preheated by a CO_2 laser, 525
Channel angle
Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing, 449
Characterisation
Image segmentation and analysis for porosity measurement, 391
Chatter
Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V, 147
Intelligent identification of turning process based on pattern recognition of cutting states, 491
Clay
The characteristics of polyamide layered-silicate nanocomposites, 410
Closed-die forging
Process design for closed-die forging of bevel gear by finite element analyses, 1
Coated tools
High speed MQL finish-turning of Inconel 718 with different coated tools, 281
Coaxial transmission line
Weaving technology and mechanical properties of extended-PTFE fabrics, 319
Comparison of electromagnetic shielding effectiveness properties of diverse conductive textiles via various measurement techniques, 549
Cold drawing
Cold drawing of micro $Ni_{80}Fe_{20}$/Cu composite wires, 350
Compaction
Performance Study of compact wood powder material processing for improved impact characteristics aiming at substitute for plastics, 422
Composite materials
Computer simulation of hard magnetic composite materials Nd–Fe–B properties, 595
Composite strip
Casting of wire-inserted composite aluminum alloy strip using a twin roll caster, 108
Composite wires
Cold drawing of micro $Ni_{80}Fe_{20}$/Cu composite wires, 350
Conductive textiles
Weaving technology and mechanical properties of extended-PTFE fabrics, 319
Comparison of electromagnetic shielding effectiveness properties of diverse conductive textiles via various measurement techniques, 549
Continuous casting
Solidification modeling in continuous casting by finite point method, 511
Continuous chip
Intelligent identification of turning process based on pattern recognition of cutting states, 491
Core drill
Parametric study on thrust force of core drill, 37
Corner
Pocketing toolpath optimization for sharp corners, 175
Counter punch
Experiments on T-shape hydroforming with counter punch, 243
Co-woven-knitted fabric (CWKF)
Weaving technology and mechanical properties of extended-PTFE fabrics, 319
Comparison of electromagnetic shielding effectiveness properties of diverse conductive textiles via various measurement techniques, 549
Crystal growth
Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template, 561
Crystal plasticity
Influence of initial texture on formability of aluminum sheet metal by crystal plasticity FE simulation, 397
Crystallization energy
A study on the thermodynamics of in situ $MgAl_2O_4$/Al MMC formation using amorphous silica sources, 588
Cup drawing
Fluid-pressure-assisted deep drawing, 8
Cutting
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
Temperature history for cutting of ceramics preheated by a CO_2 laser, 525
Cutting edge
Analysis acoustic emission and sound during the paperboard of cutting process, 134
Cutting force constants
Empirical analysis of cutting force constants in micro-end-milling operations, 41
Cutting forces
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation, 607
Cutting tool
Effect of surface hardness of counter plate on crushing of blade tip during pushing shear of paperboard, 265

DC53 die steel
Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model, 459
Deep drawing
Fluid-pressure-assisted deep drawing, 8
Deformation zone
Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing, 449
Derivation analysis
Applications of the artificial intelligence methods for modeling of the ACAlSi7Cu alloy crystallization process, 582
Diamond
Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method, 453
Diamond shaping
Toolpath generation for diamond shaping of aspheric lens array, 194
Die cutting
Analysis acoustic emission and sound during the paperboard of cutting process, 134
Die design
Process design for closed-die forging of bevel gear by finite element analyses, 1
Die material
Electrode form design of large holes of die material in ultrasonic electrochemical finishing, 470
Die-less
The simulation of the multi-pass and die-less spinning process, 518
Diffusion bonding
Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method, 453

Direct drive
Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes, 478
Downward melt drag twin roll caster
Casting of wire-inserted composite aluminum alloy strip using a twin roll caster, 108
Draw-wall
Analysis of draw-wall wrinkling in the stamping of a motorcycle oil tank, 200
Drilling
Parametric study on thrust force of core drill, 37
Ductile mode cutting
Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation, 607
Dynamic cutting force
Intelligent identification of turning process based on pattern recognition of cutting states, 491
Dynamic recrystallization
High temperature deformation in Ti–5Al–2.5Sn alloy, 434
Dynamic-explicit
The simulation of the multi-pass and die-less spinning process, 518

EBW
Investigations into the effects of electron beam welding on thick Ti–6Al–4V titanium alloy, 83
ECAE process
Study of deformation homogeneity in the multi-pass equal channel angular extrusion process, 121
Edge linking
Image segmentation and analysis for porosity measurement, 391
Elasto-plastic
An analysis of forming limit in the elliptic hole-flanging process of sheet metal, 373
Electrical force microscopy
Hybrid laser micro/nanofabrication of phase change materials with combination of chemical processing, 340
Electrode design
Electrode form design of large holes of die material in ultrasonic electrochemical finishing, 470
Electrodeposition
Nanocrystalline grain size control for $Ni_{80}Fe_{20}$/Cu micro-composite wires by different electrodeposition methods, 225
Electrodeposition of Ni–Fe micro-pillars using laser drilled templates, 346
Electromagnetic shielding effectiveness (EMSE)
Weaving technology and mechanical properties of extended-PTFE fabrics, 319
Comparison of electromagnetic shielding effectiveness properties of diverse conductive textiles via various measurement techniques, 549
Electron backscattering diffraction (EBSD)
High temperature deformation in Ti–5Al–2.5Sn alloy, 434
Elliptic
An analysis of forming limit in the elliptic hole-flanging process of sheet metal, 373
Embossing
Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets, 18
End-milling
Empirical analysis of cutting force constants in micro-end-milling operations, 41
Endurance
Effect of surface hardness of counter plate on crushing of blade tip during pushing shear of paperboard, 265
Environmental-friendly
Performance Study of compact wood powder material processing for improved impact characteristics aiming at substitute for plastics, 422
Equal channel angular consolidation
Back pressure equal channel angular consolidation—Application in producing aluminium matrix composites with fine flyash particles, 355
Equal channel angular extrusion
Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing, 449
Equal channel angular extrusion (ECAE) process
Bulk nanostructured processing of aluminum alloy, 575
Equal channel angular pressing
Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing, 449
Error compensation algorithm
Development and performance evaluation of an ultra precision ELID grinding machine, 287
Extrusion ratio
Investigation into cold extrusion of aluminum billets using three-dimensional finite element method, 188

Far infrared ray
PET/PP blend with bamboo charcoal to produce functional composites, 428
FE method
Developing a realistic FE analysis method for the welding of a NET single-bead-on-plate test specimen, 497
Femtosecond laser
Sub-micron surface patterning by laser irradiation through microlens arrays, 328
Fiber
Transfer molding of bamboo, 259
Fiber loading
The investigation of fiber carding performance with the application of static electricity to carded nonwoven fabric process, 543
Fiber web uniformity
The investigation of fiber carding performance with the application of static electricity to carded nonwoven fabric process, 543
Fineblanking
Study on flanged shapes in fineblanked-hole flanging process (FB-hole flanging process) using finite element method (FEM), 128
An investigation of material flow analysis in fineblanking process, 237
Finite element
An analysis of forming limit in the elliptic hole-flanging process of sheet metal, 373
Finite element analysis
Process design for closed-die forging of bevel gear by finite element analyses, 1
Tool design for the tubular press forming of a rear suspension member with the finite element analysis, 181
Analysis of draw-wall wrinkling in the stamping of a motorcycle oil tank, 200
Calculation of strain gradient in flow formulation using strain surface function and its applications to micro rolling, 218
Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing, 449
Finite element deformation model
3D nano-scale cutting model for nickel material, 27
Finite element method
Numerical analysis for bifurcation fracture of sheet metal forming, 602
Finite element method (FEM)
Study on flanged shapes in fineblanked-hole flanging process (FB-hole flanging process) using finite element method (FEM), 128
An investigation of material flow analysis in fineblanking process, 237
Finite element simulations
A study of forming pressure in the tube-hydroforming process, 404

Finite point method
Solidification modeling in continuous casting by finite point method, 511
Flanging
Study on flanged shapes in fineblanked-hole flanging process (FB-hole flanging process) using finite element method (FEM), 128
Flexible forming
A flexible shear spinning of axi-symmetrical shells with a general-purpose mandrel, 13
Flow formulation
Calculation of strain gradient in flow formulation using strain surface function and its applications to micro rolling, 218
Fluid pressure
Fluid-pressure-assisted deep drawing, 8
Fluidity
Transfer molding of bamboo, 259
Flyash
Back pressure equal channel angular consolidation—Application in producing aluminium matrix composites with fine flyash particles, 355
Forming pressure
A study of forming pressure in the tube-hydroforming process, 404
Foundry CAE technology
High pressure diecasting module of InteCAST software and its applications, 249
Free-form surface
An alternate approach to free-form surface fabrication, 465
Free-standing diamond
Characteristics of ZnO thin film deposited by ion beam sputter, 55

Grain growth
Two-stage sintering of nano-sized yttria stabilized zirconia process by powder injection moulding, 312
Graphite
Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method, 453
Gravity casting
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114

Handle
Optimal process of warp-knitting fabric with multiple functions, 323
Hardened die steel
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
Heat transfer analysis
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114
Heat treatment
Structure and properties of magnesium cast alloys, 567
High energy ball milling
Synthesis of complex ceramics by mechanochemical activation, 255
High pressure diecasting
High pressure diecasting module of InteCAST software and its applications, 249
High-speed turning
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
Hole-flanging
An analysis of forming limit in the elliptic hole-flanging process of sheet metal, 373
Hot extrusion tube
Investigation of the influence of process parameters on hot extrusion of magnesium alloy tubes, 292
Hot isostatic pressing
Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method, 453
HSM
Pocketing toolpath optimization for sharp corners, 175
Hybrid machining
Tool-based micro-machining, 204
Hydrothermal treatment
Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template, 561
Hygroscopicity
Optimal process of warp-knitting fabric with multiple functions, 323

In situ composites
A study on the thermodynamics of in situ $MgAl_2O_4$/Al MMC formation using amorphous silica sources, 588
Inconel 718
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
High speed MQL finish-turning of Inconel 718 with different coated tools, 281
Injection molding
PET/PP blend with bamboo charcoal to produce functional composites, 428
Influence of reprocessing on the mechanical properties and structure of polyamide 6, 532
Insert
The study of rapid prototyping process with embedded functional inserts, 68
InteCAST software
High pressure diecasting module of InteCAST software and its applications, 249
Intelligent machine
Development and performance evaluation of an ultra precision ELID grinding machine, 287
Internal threads
Experimental investigation of ultrasonic vibration-assisted tapping, 306
Ion beam sputter
Characteristics of ZnO thin film deposited by ion beam sputter, 55

Joining
Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method, 453

Lapping
Removal rate and surface roughness in the lapping and polishing of RB-SiC optical components, 276
Large holes
Electrode form design of large holes of die material in ultrasonic electrochemical finishing, 470
Laser
Nanopatterning mask fabrication by femtosecond laser irradiation, 212
Temperature history for cutting of ceramics preheated by a CO_2 laser, 525
Laser fabrication
Electrodeposition of Ni–Fe micro-pillars using laser drilled templates, 346
Laser feed rate
Surface transformation of DF-2 steel after continuous mode laser irradiation, 89
Laser irradiation
Surface transformation of DF-2 steel after continuous mode laser irradiation, 89
Laser-beam treatment
Processing treatment of a lead-free Sn–Ag–Cu–Bi solder by rapid laser-beam reflowing and the creep property of its soldered connection, 539
Latent heat
Thermo-elasto-plastic finite element analysis of quenching process of carbon steel, 381

Layered manufacturing
Manufacture of three-dimensional valveless micropump, 229
Lead-free solder
Processing treatment of a lead-free Sn–Ag–Cu–Bi solder by rapid laser-beam reflowing and the creep property of its soldered connection, 539
Linear motor
Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes, 478
Loading path
Experiments on T-shape hydroforming with counter punch, 243
Low alloy steel
A study on ultrasonic vibration cutting of low alloy steel, 159

Machining
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
Machining accuracy
Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes, 478
Magnesium alloys
Investigation of the influence of process parameters on hot extrusion of magnesium alloy tubes, 292
Feasibility study of twin roll casting process for magnesium alloys, 300
Structure and properties of magnesium cast alloys, 567
Magnesium strip
Processing of thin metal strip by casting-cum-rolling, 101
Mass scaling factor
The simulation of the multi-pass and die-less spinning process, 518
Material flow
An investigation of material flow analysis in fineblanking process, 237
Material hardening
A study of forming pressure in the tube-hydroforming process, 404
Material removal rate
Removal rate and surface roughness in the lapping and polishing of RB-SiC optical components, 276
Maximum *m* superplasticity deformation
Maximum *m* superplasticity deformation for Ti–6Al–4V titanium alloy, 555
Mechanical properties
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114
Investigation of the influence of process parameters on hot extrusion of magnesium alloy tubes, 292
Relationship of microstructure and mechanical properties of TRIP-aided steel processed by press forging, 367
The characteristics of polyamide layered-silicate nanocomposites, 410
Structure and properties of magnesium cast alloys, 567
Melt compounding
PET/PP blend with bamboo charcoal to produce functional composites, 428
Melt intercalation
The characteristics of polyamide layered-silicate nanocomposites, 410
Meshless method
Solidification modeling in continuous casting by finite point method, 511
Mesoporous
Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template, 561
Metal foams
Image segmentation and analysis for porosity measurement, 391
Metal forming
A flexible shear spinning of axi-symmetrical shells with a general-purpose mandrel, 13
Metal matrix composites
Surface finish and integrity of machined surfaces on Al/SiCp composites, 166
$MgAl_2O_4$
A study on the thermodynamics of in situ $MgAl_2O_4$/Al MMC formation using amorphous silica sources, 588
Micro rolling
Calculation of strain gradient in flow formulation using strain surface function and its applications to micro rolling, 218
Microchannel
Manufacture of three-dimensional valveless micropump, 229
Micro-EDG
Tool-based micro-machining, 204
Micro-EDM
Tool-based micro-machining, 204
Micro-EDM milling
Tool-based micro-machining, 204
Micro-fabrication
Micro-mould fabrication for a micro-gear via vacuum casting, 334
Microlens arrays
Sub-micron surface patterning by laser irradiation through microlens arrays, 328
Micro-machining
Empirical analysis of cutting force constants in micro-end-milling operations, 41
Micro-mould
Micro-mould fabrication for a micro-gear via vacuum casting, 334
Micropump
Manufacture of three-dimensional valveless micropump, 229
Microstructure
Effect of deformation condition on structure development in nickel base alloy, 360
Micro-Turning
Tool-based micro-machining, 204
Milling
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
Modeling
Developing a realistic FE analysis method for the welding of a NET single-bead-on-plate test specimen, 497
Modelling of CCT diagrams for engineering and constructional steels, 504
Moisture content
Transfer molding of bamboo, 259
Mold machining
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
Molds and dies
An alternate approach to free-form surface fabrication, 465
Molecular dynamics
Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation, 607
Molecular dynamics (MD)
3D nano-scale cutting model for nickel material, 27
Motion control
Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes, 478
MQL cutting
High speed MQL finish-turning of Inconel 718 with different coated tools, 281
Multi-pass
The simulation of the multi-pass and die-less spinning process, 518
Multiple regression
Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model, 459

Nanocomposites
The characteristics of polyamide layered-silicate nanocomposites, 410

Nanocrystalline grain size
Nanocrystalline grain size control for $Ni_{80}Fe_{20}$/Cu micro-composite wires by different electrodeposition methods, 225
Nanofabrication
Nanopatterning mask fabrication by femtosecond laser irradiation, 212
Nano-scale cutting
3D nano-scale cutting model for nickel material, 27
Nano-sized Y-TZP
Two-stage sintering of nano-sized yttria stabilized zirconia process by powder injection moulding, 312
Nd–Fe–B magnets
Computer simulation of hard magnetic composite materials Nd–Fe–B properties, 595
NDT
Investigations into the effects of electron beam welding on thick Ti–6Al–4V titanium alloy, 83
Near-field scanning optical microscopy
Hybrid laser micro/nanofabrication of phase change materials with combination of chemical processing, 340
Necking
An analysis of forming limit in the elliptic hole-flanging process of sheet metal, 373
Neural networks
Modelling of CCT diagrams for engineering and constructional steels, 504
Applications of the artificial intelligence methods for modeling of the ACAlSi7Cu alloy crystallization process, 582
Computer simulation of hard magnetic composite materials Nd–Fe–B properties, 595
Nickel
3D nano-scale cutting model for nickel material, 27
Nickel alloy
Effect of deformation condition on structure development in nickel base alloy, 360
Nitrogen doping
Photocatalytic activity of doped TiO_2 coatings prepared by sputtering deposition, 60
Non-linear absorption
Nanopatterning mask fabrication by femtosecond laser irradiation, 212
Nonwoven
Manufacturing process and property analysis of industrial flame retarded PET fiber and polyurethane composite, 415

On-line de-cubing
The study of rapid prototyping process with embedded functional inserts, 68
On-line monitoring
Development and performance evaluation of an ultra precision ELID grinding machine, 287
Optical near field
Nanopatterning mask fabrication by femtosecond laser irradiation, 212
Optimum design
Analysis of draw-wall wrinkling in the stamping of a motorcycle oil tank, 200
Orientation distribution function (ODF)
Influence of initial texture on formability of aluminum sheet metal by crystal plasticity FE simulation, 397
Orthogonal array
Investigation of the influence of process parameters on hot extrusion of magnesium alloy tubes, 292
Orthopedics
In vitro study of bone-like apatite coatings on metallic fiber braids, 97
Overlapping scanning
Surface transformation of DF-2 steel after continuous mode laser irradiation, 89
Oxidation
A study on the thermodynamics of in situ $MgAl_2O_4$/Al MMC formation using amorphous silica sources, 588

Paperboard
Analysis acoustic emission and sound during the paperboard of cutting process, 134
Effect of surface hardness of counter plate on crushing of blade tip during pushing shear of paperboard, 265
Particles
Back pressure equal channel angular consolidation—Application in producing aluminium matrix composites with fine flyash particles, 355
Particulate reinforced epoxy composites
Development of epoxy matrix composites for rapid tooling applications, 75
Pattern recognition
Intelligent identification of turning process based on pattern recognition of cutting states, 491
Permalloy
Nanocrystalline grain size control for $Ni_{80}Fe_{20}$/Cu micro-composite wires by different electrodeposition methods, 225
Electrodeposition of Ni–Fe micro-pillars using laser drilled templates, 346
Permeability
Optimal process of warp-knitting fabric with multiple functions, 323
Phase change material
Hybrid laser micro/nanofabrication of phase change materials with combination of chemical processing, 340
Phase transformation
Thermo-elasto-plastic finite element analysis of quenching process of carbon steel, 381
High porosity and large pore size shape memory alloys fabricated by using pore-forming agent (NH_4HCO_3) and capsule-free hot isostatic pressing, 439
Photocatalytic activity
Photocatalytic activity of doped TiO_2 coatings prepared by sputtering deposition, 60
Photolithography
Micro-mould fabrication for a micro-gear via vacuum casting, 334
Physical vapor deposition
Photocatalytic activity of doped TiO_2 coatings prepared by sputtering deposition, 60
Piezoelectric
Manufacture of three-dimensional valveless micropump, 229
Piezoelectric actuator
Experimental investigation of ultrasonic vibration-assisted tapping, 306
Plastic deformation
Effect of surface hardness of counter plate on crushing of blade tip during pushing shear of paperboard, 265
Plastic formability
Feasibility study of twin roll casting process for magnesium alloys, 300
Plastic substitute
Performance Study of compact wood powder material processing for improved impact characteristics aiming at substitute for plastics, 422
Polishing
Removal rate and surface roughness in the lapping and polishing of RB-SiC optical components, 276
An alternate approach to free-form surface fabrication, 465
Electrode form design of large holes of die material in ultrasonic electrochemical finishing, 470
Polyamide
The characteristics of polyamide layered-silicate nanocomposites, 410

Polyamide 6 (PA6)
Influence of reprocessing on the mechanical properties and structure of polyamide 6, 532
Polycrystalline diamond (PCD) inserts
Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V, 147
Polyester
Manufacturing process and property analysis of industrial flame retarded PET fiber and polyurethane composite, 415
Polymer abrasive gel
Developing the polymer abrasive gels in AFM processs, 486
Pore-forming agent
High porosity and large pore size shape memory alloys fabricated by using pore-forming agent (NH_4HCO_3) and capsule-free hot isostatic pressing, 439
Porous NiTi SMAs
High porosity and large pore size shape memory alloys fabricated by using pore-forming agent (NH_4HCO_3) and capsule-free hot isostatic pressing, 439
Powder injection moulding
Two-stage sintering of nano-sized yttria stabilized zirconia process by powder injection moulding, 312
Powder metallurgy
Back pressure equal channel angular consolidation—Application in producing aluminium matrix composites with fine flyash particles, 355
Corrosion resistance of sintered duplex stainless steels in the salt fog spray test, 443
Powder reaction synthesis
Synthesis of complex ceramics by mechanochemical activation, 255
Precipitation
Structure and properties of magnesium cast alloys, 567
Primary and secondary serrated teeth
Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V, 147
Process design
Process design for closed-die forging of bevel gear by finite element analyses, 1
Pulse-reverse
Nanocrystalline grain size control for $Ni_{80}Fe_{20}$/Cu micro-composite wires by different electrodeposition methods, 225

Quantities assessment of the crystallization process
Applications of the artificial intelligence methods for modeling of the ACAlSi7Cu alloy crystallization process, 582
Quenching
Thermo-elasto-plastic finite element analysis of quenching process of carbon steel, 381

Rapid manufacturing
Development of epoxy matrix composites for rapid tooling applications, 75
Rapid prototyping
The study of rapid prototyping process with embedded functional inserts, 68
Rapid tooling
Development of epoxy matrix composites for rapid tooling applications, 75
Reaction-bonded silicon carbide
Removal rate and surface roughness in the lapping and polishing of RB-SiC optical components, 276
Reactive ion etching (RIE)
Sub-micron surface patterning by laser irradiation through microlens arrays, 328
Recrystallization
Effect of deformation condition on structure development in nickel base alloy, 360
Reflowing process
Processing treatment of a lead-free Sn–Ag–Cu–Bi solder by rapid laser-beam reflowing and the creep property of its soldered connection, 539
Reprocessing
Influence of reprocessing on the mechanical properties and structure of polyamide 6, 532
Residual stress
Developing a realistic FE analysis method for the welding of a NET single-bead-on-plate test specimen, 497
Restoration
Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets, 18
Rigid-plastic finite element
Investigation into cold extrusion of aluminum billets using three-dimensional finite element method, 188
Roll casting
Casting of wire-inserted composite aluminum alloy strip using a twin roll caster, 108
Rotary forming
A flexible shear spinning of axi-symmetrical shells with a general-purpose mandrel, 13

Salt fog spray test
Corrosion resistance of sintered duplex stainless steels in the salt fog spray test, 443
Scanning EDM
Tool-based micro-machining, 204
Schaffler's diagram
Corrosion resistance of sintered duplex stainless steels in the salt fog spray test, 443
Severe plastic deformation
Deformation behavior and strain homogeneity in equal channel angular extrusion/pressing, 449
Shape deposition manufacturing (SDM)
Manufacture of three-dimensional valveless micropump, 229
Shear spinning
A flexible shear spinning of axi-symmetrical shells with a general-purpose mandrel, 13
Silicon wafer
Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation, 607
Silicone rubber
Developing the polymer abrasive gels in AFM processs, 486
Simulation
Computer simulation of hard magnetic composite materials Nd–Fe–B properties, 595
Simulation code
Numerical analysis for bifurcation fracture of sheet metal forming, 602
Sintered duplex stainless steels
Corrosion resistance of sintered duplex stainless steels in the salt fog spray test, 443
Solidification
Feasibility study of twin roll casting process for magnesium alloys, 300
Solidification modeling in continuous casting by finite point method, 511
Solidification time
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114
Spinning
A flexible shear spinning of axi-symmetrical shells with a general-purpose mandrel, 13
The simulation of the multi-pass and die-less spinning process, 518
Spoke measurement
Image segmentation and analysis for porosity measurement, 391

Squeeze casting
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114
316L stainless steel
In vitro study of bone-like apatite coatings on metallic fiber braids, 97
Stamping die design
Analysis of draw-wall wrinkling in the stamping of a motorcycle oil tank, 200
Static electricity
The investigation of fiber carding performance with the application of static electricity to carded nonwoven fabric process, 543
Steel
Modelling of CCT diagrams for engineering and constructional steels, 504
Stefan problem
Solidification modeling in continuous casting by finite point method, 511
Strain components
Calculation of strain gradient in flow formulation using strain surface function and its applications to micro rolling, 218
Strain gradient plasticity
Calculation of strain gradient in flow formulation using strain surface function and its applications to micro rolling, 218
Stress
Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation, 607
Strip casting
Casting of wire-inserted composite aluminum alloy strip using a twin roll caster, 108
Structure
Relationship of microstructure and mechanical properties of TRIP-aided steel processed by press forging, 367
Structure and properties of magnesium cast alloys, 567
Superalloy
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
Superplastic deformaiton
Maximum *m* superplasticity deformation for Ti–6Al–4V titanium alloy, 555
Superplasticity
High temperature deformation in Ti–5Al–2.5Sn alloy, 434
Surface finish
Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V, 147
A study on ultrasonic vibration cutting of low alloy steel, 159
Surface finish and integrity of machined surfaces on Al/SiCp composites, 166
Surface integrity
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
Surface finish and integrity of machined surfaces on Al/SiCp composites, 166
Surface morphology
Surface transformation of DF-2 steel after continuous mode laser irradiation, 89
Surface patterning
Sub-micron surface patterning by laser irradiation through microlens arrays, 328
Surface plasmon
Nanopatterning mask fabrication by femtosecond laser irradiation, 212
Surface roughness
An investigation of cutting forces and surface damage in high-speed turning of Inconel 718, 139
Removal rate and surface roughness in the lapping and polishing of RB-SiC optical components, 276
Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model, 459
Surfactant template
Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template, 561

Taguchi method
Parametric study on thrust force of core drill, 37
Investigation of the influence of process parameters on hot extrusion of magnesium alloy tubes, 292
Manufacturing process and property analysis of industrial flame retarded PET fiber and polyurethane composite, 415
Tapping
Experimental investigation of ultrasonic vibration-assisted tapping, 306
Temperature
Temperature history for cutting of ceramics preheated by a CO_2 laser, 525
Study of the temperature and stress in nanoscale ductile mode cutting of silicon using molecular dynamics simulation, 607
Template
Electrodeposition of Ni–Fe micro-pillars using laser drilled templates, 346
Tensile strength
Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets, 18
Texture
Influence of initial texture on formability of aluminum sheet metal by crystal plasticity FE simulation, 397
Theoretical model
A study of forming pressure in the tube-hydroforming process, 404
Thermal creep
Processing treatment of a lead-free Sn–Ag–Cu–Bi solder by rapid laser-beam reflowing and the creep property of its soldered connection, 539
Thermal insulation
Manufacturing process and property analysis of industrial flame retarded PET fiber and polyurethane composite, 415
Thermal modification
Applications of the artificial intelligence methods for modeling of the ACAlSi7Cu alloy crystallization process, 582
Thermal stability
The characteristics of polyamide layered-silicate nanocomposites, 410
Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template, 561
Thermo-elastic-plastic finite element analysis
Thermo-elasto-plastic finite element analysis of quenching process of carbon steel, 381
Thermomechanical processing
Effect of deformation condition on structure development in nickel base alloy, 360
Thin metal strip
Processing of thin metal strip by casting-cum-rolling, 101
Three-dimensional extrusion
Investigation into cold extrusion of aluminum billets using three-dimensional finite element method, 188
Thrust force
Parametric study on thrust force of core drill, 37
Ti–6Al–4V
Investigations into the effects of electron beam welding on thick Ti–6Al–4V titanium alloy, 83
Maximum *m* superplasticity deformation for Ti–6Al–4V titanium alloy, 555
Tin oxide/silica
Hydrothermal synthesis and characterization of mesoporous SnO_2/SnO_2–SiO_2 on neutral template, 561
Titanium
Diffusion bonding of Ti/graphite and Ti/diamond by hot isostatic pressing method, 453

Titanium alloys
Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V, 147
Maximum *m* superplasticity deformation for Ti–6Al–4V titanium alloy, 555
Titanium oxide
Photocatalytic activity of doped TiO_2 coatings prepared by sputtering deposition, 60
Tool design
Tool design for the tubular press forming of a rear suspension member with the finite element analysis, 181
Tool flank wear
A study on ultrasonic vibration cutting of low alloy steel, 159
Tool life
Development of cBN ball-nosed end mill with newly designed cutting edge, 48
Tool wear
Effectiveness of uncoated WC–Co and PCD inserts in end milling of titanium alloy—Ti–6Al–4V, 147
High speed MQL finish-turning of Inconel 718 with different coated tools, 281
Tool wear acceleration
A study on ultrasonic vibration cutting of low alloy steel, 159
Tool-based machining
Tool-based micro-machining, 204
Toolpath compensation
Toolpath generation for diamond shaping of aspheric lens array, 194
Toolpath generation
Toolpath generation for diamond shaping of aspheric lens array, 194
Toolpath optimization
Pocketing toolpath optimization for sharp corners, 175
Total elongation
Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets, 18
Transfer molding
Transfer molding of bamboo, 259
Transformation process
Relationship of microstructure and mechanical properties of TRIP-aided steel processed by press forging, 367
Transmission stiffness
Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes, 478
TRIP steel
Relationship of microstructure and mechanical properties of TRIP-aided steel processed by press forging, 367
Tube hydroforming
Experiments on T-shape hydroforming with counter punch, 243
A study of forming pressure in the tube-hydroforming process, 404
Tubular press forming
Tool design for the tubular press forming of a rear suspension member with the finite element analysis, 181
Tubular torsion beam axle
Tool design for the tubular press forming of a rear suspension member with the finite element analysis, 181
Turning
Intelligent identification of turning process based on pattern recognition of cutting states, 491
Twin roll caster
Casting of wire-inserted composite aluminum alloy strip using a twin roll caster, 108
Twin roll casting
Processing of thin metal strip by casting-cum-rolling, 101
Feasibility study of twin roll casting process for magnesium alloys, 300
Twist drill
Parametric study on thrust force of core drill, 37
Two-stage sintering
Two-stage sintering of nano-sized yttria stabilized zirconia process by powder injection moulding, 312

Ultrasonic electrochemical finishing
Electrode form design of large holes of die material in ultrasonic electrochemical finishing, 470
Ultrasonic vibration cutting
A study on ultrasonic vibration cutting of low alloy steel, 159

Vacuum casting
Micro-mould fabrication for a micro-gear via vacuum casting, 334
Valveless
Manufacture of three-dimensional valveless micropump, 229
Vapor steaming processing
Performance Study of compact wood powder material processing for improved impact characteristics aiming at substitute for plastics, 422
Viscoplastic material
Numerical analysis for bifurcation fracture of sheet metal forming, 602

Warm deep drawability
Feasibility study of twin roll casting process for magnesium alloys, 300
Warp-knitted fabrics
Optimal process of warp-knitting fabric with multiple functions, 323
Welding
Developing a realistic FE analysis method for the welding of a NET single-bead-on-plate test specimen, 497
Wiper insert
Surface finish and integrity of machined surfaces on Al/SiCp composites, 166
Wire electrical discharge machining
Developing the polymer abrasive gels in AFM processs, 486
Wire-EDM
Effects of wire-EDM machining variables on surface roughness of newly developed DC 53 die steel: Design of experiments and regression model, 459
Comparison on linear synchronous motors and conventional rotary motors driven Wire-EDM processes, 478
Wood powder
Performance Study of compact wood powder material processing for improved impact characteristics aiming at substitute for plastics, 422
Wrinkles
Analysis of draw-wall wrinkling in the stamping of a motorcycle oil tank, 200

X-ray diffraction
Synthesis of complex ceramics by mechanochemical activation, 255
X-ray tomography
Image segmentation and analysis for porosity measurement, 391

Yield stress
Influence of embossing and restoration on the mechanical properties of aluminum alloy sheets, 18

Zinc alloy
The effect of solidification time in squeeze casting of aluminium and zinc alloys, 114
ZnO film
Characteristics of ZnO thin film deposited by ion beam sputter, 55
